Arrays
Ch 7

[“Hip”, “Hip”]

Hip Hip Array
Highlights

- arrays in functions

```c
double arr[5];
foo(arr);
```

- 2D arrays

```c
int box[3][4];
// 3 rows, 4 columns
```
Sort

Let's practice arrays by sorting!

(See: sort.cpp)
Sort

Let's practice arrays by sorting!

Plan of attack:

1. Make a new array
2. Find minimum element in original array and copy into new array
3. Replace minimum element in original array with the maximum element
4. Repeat 2 to 3 until done

(See: sort.cpp)
Multidimensional Arrays

So far we have dealt with simple (one dimensional) arrays

We have represented this as all the data being stored in a line

(See: lineWorld.cpp)
Multidimensional Arrays

```java
int foo[][] = new int[3][5];
```

foo's length = 3 (number of rows)

foo[0]'s length = 5 (number of columns in row 0)
Multidimensional Arrays

If we think of a couple simple (one dimensional) arrays on top of each other...

<table>
<thead>
<tr>
<th>Index</th>
<th>0</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
<th>9</th>
</tr>
</thead>
<tbody>
