## CSci 2033 Practice Exercises Set \#14 April 18, 2018

Text Sect 6.1: Practice Pb., Pb. 17, 19, 25; Sect. 6.5 : Practice Pb., Pb. 3; Sect. 6.6: Practice Pb., Pb. 3, Pb. 11.

1 (Recommender systems) Paul, Jane, and Ann, share information about their likes and dislikes of movies. They rate films they see with a scale of 0 to 10 , (10 means they liked the movie very much). Here is the status of their table of ratings when Ann was interested in a new movie ('Title 6'):

|  | Title 1 | Title 2 | Title 3 | Title 4 | Title 5 | Title 6 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Paul | 4 | 9 | 2 | 7 | 8 | 3 |
| Jane | 8 | 3 | 6 | 4 | 3 | 8 |
| Ann | 4 | 8 | 1 | 4 | 6 | $?$ |

Using titles 1 to 5 find a set of coefficients that 'predict' Ann's ratings using a linear combination of Paul's and Jane's ratings. Predict her rating of title 6 .
